Yukeshwaran N

SERVICE & RESPONSIBILITY CHARTER

Director of Cybersecurity
SECURITY LEADERSHIP

Secure Full-Stack Developer
ENGINEERING ROLE

7 Defined Roles
SCOPE OF RESPONSIBILITY

7 Core Service Areas
DELIVERY COVERAGE

- Director of Cybersecurity
- Secure Full-Stack Developer
- Project Lead
- QA Lead
- DevSecOps Engineer
- Security Trainer & Mentor
- Business & Product Strategist

MY 7 ROLES AT PRASKLA TECHNOLOGY

As **Director of Cybersecurity**, I lead all security strategy, standards, and enforcement. As **Secure Full-Stack Developer**, I build products end-to-end with security embedded from day one.

As **Project Lead**, I own delivery and team alignment for SELMA. As **QA Lead**, I ensure that every release meets stringent quality expectations. As **DevSecOps Engineer**, I secure every pipeline and CI/CD process.

As **Security Trainer & Mentor**, I grow the next generation of secure developers at Praskla. As **Business & Product Strategist**, I drive product vision and align client requirements with technical execution.

Roles & Responsibilities

01 Director of Cybersecurity

DIRECTOR OF CYBERSECURITY

SECURITY GOVERNANCE

- Security Strategy & Policy Ownership
- Risk Management & Compliance
- Business Growth Oversight
- Company-Wide Security Standards
- Cross-Team Security Enforcement
- Process & Operational Improvement

SECURITY VALIDATION

- Vulnerability Assessment & Penetration Testing (VAPT)
- API Security Testing
- Security Recommendations
- Authentication & Authorization Testing
- Security Risk Analysis
- Quality Standards Enforcement

OBJECTIVE

Lead and own all security strategy, standards, validation, and enforcement across every product and process at Praskla — ensuring security is a company-wide discipline, not a single team's concern.

02 Secure Full-Stack Developer

SECURE FULL-STACK DEVELOPER

ENGINEERING

- Full-Stack Development
- Secure Coding Practices
- Security-by-Design Implementation
- Secure Architecture Review
- Application Development
- Production Readiness Support

OBJECTIVE

Build products end-to-end with security embedded from the first line of code — combining full-stack development with security engineering to deliver reliable, scalable, and resilient systems.

03 Project Lead

PROJECT LEAD

PROJECT — SELMA

- Project Planning & Scoping
- Team Coordination
- Risk Identification & Mitigation
- Stakeholder Communication
- Sprint Alignment
- Milestone Tracking
- Delivery Monitoring
- Release Readiness Verification

OBJECTIVE

Ensure project execution remains aligned with business goals, timelines, and client expectations — driving SELMA from planning to delivery with clarity and accountability.

04 QA Lead

• QA LEAD

QUALITY VALIDATION

- › Functional Testing & Verification
- › User Acceptance Validation
- › Quality Standards Enforcement
- › Regression Testing Workflows
- › Release Readiness Verification
- › Automated Quality Checks

OBJECTIVE

Ensure every product release meets the highest bar for quality, functionality, and user experience — serving as the final gatekeeper before production.

05 DevSecOps Engineer

• DEVSECOPS ENGINEER

• SECURE FULL-STACK DEVELOPER

PIPELINE & INTEGRATION

- › CI/CD Security Integration
- › Static Application Security Testing (SAST)
- › Dependency & Vulnerability Scanning
- › Automated Security Testing in Pipelines
- › Dynamic Application Security Testing (DAST)
- › Secret Detection & Prevention

CULTURE & PROCESS

- › Shift-Left Security Implementation
- › Developer Security Awareness
- › Incident Response Readiness
- › Security Gates in Release Process
- › Secure Infrastructure as Code (IaC)
- › Continuous Compliance Monitoring

OBJECTIVE

Embed security seamlessly into every phase of the development and deployment pipeline — making security a shared responsibility across development, operations, and business teams.

06 Security Trainer & Mentor

• SECURITY TRAINER & MENTOR

TEACHING FOCUS

- › Secure-by-Design Principles
- › Secure Code Review & Guidance
- › Hands-on Secure Coding Sessions
- › Security-First Development Mindset
- › OWASP Top 10 & Security Standards
- › Threat Modelling Fundamentals

TRAINING METHODS

- › 1-on-1 Mentorship Sessions
- › Security Anti-Pattern Reviews
- › Security Checklist Adoption
- › Live Code Walkthroughs
- › Guided Project-Based Learning
- › Post-Review Knowledge Sharing

OBJECTIVE

Equip interns and trainees with the knowledge and mindset to build secure software from day one — embedding security into every stage of development before bad habits form.

07 Business & Product Strategist

• BUSINESS & PRODUCT STRATEGIST

PRODUCT PLANNING

- › PRD Documentation Preparation
- › Requirement Gathering & Analysis
- › User Story Creation
- › Client Calls alongside CEO
- › Scope Definition & Feature Prioritization
- › Business Requirement Analysis

OBJECTIVE

Bridge the gap between business objectives and technical execution — gathering direct client requirements and translating them into actionable, well-documented product plans.

VISION

My goal is to become a business-aware secure software leader who can contribute across development, security, product planning, project delivery, and business operations.

By combining technical excellence with business understanding, I aim to help Praskla Technology build secure products, scalable processes, and sustainable growth.
